

July, 2016

Dear Editor,

We wish to submit a new manuscript entitled “Teachers’ Knowledge Concerning Dental Trauma and Its Management in Primary Schools in Riyadh, Saudi Arabia” for consideration by the oral health and dental management journal.

Our aim of this study is to assess the knowledge concerning dental traumatic injuries and its management among primary schools’ teachers in Riyadh, Saudi Arabia. This is significant because around the age of 14 years, nearly 25% of the children had a previous injury involving the permanent teeth. Studies conducted in several countries (UAE, India, China, Brazil) concluded that there is lack of knowledge among primary school teachers in managing traumatic dental injuries especially tooth avulsion. The paper should be of interest to readers in the field of both education and dentistry.

We confirm that this work is original and has not been published elsewhere nor is it currently under consideration for publication elsewhere.

We acknowledge Mr. Nassr Almaflehi for the great assistance provided in statistical data analysis and cooperation.

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Please address all correspondence concerning this manuscript to me at [Mashaef.a@hotmail.com].

Thank you for your consideration of this manuscript.

Sincerely,

Mashaef Abuabat
